Some of the works we did for our clients

This is a simple home page of an informational website that we developed for one of our clients in Angular.

This is the landing page of a telemedicine application we developed for our client name: Virtual Sathi Pvt. Ltd.

OUR SERVICES

Application Development

We develop web and mobile applications specific to your business needs.

Healthcare software

Our Clinic management softwares and telemed softwares are some of our best in class products.

Technology consultation

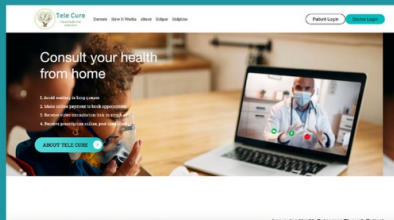

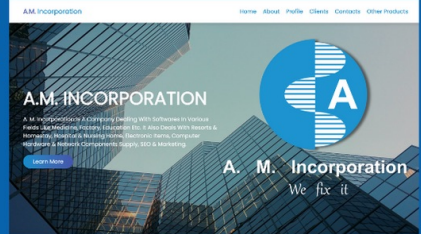

We also offer technology and software consultation for your business

Cloud Migration

Migrate your existing application to cloud for increased availability.

The images of the works shared here are just a small subset of the list of work we have done so far. Our team here at Wizz Tech is capable of developing any kind of software provided the requirements are gathered properly. If you have a business or a plan we would be more than happy to get you started! 😊

This is the landing page of another informational website that we developed for our client

This is the landing page of our in-house telemedicine software - TeleCure which can be utilised by our clients with monthly, quarterly or annual subscriptions.
